SUMMARY

Customer Success Specialist with 1.5+ years of experience in client-facing roles, multi-channel communication, and SaaS product support. Experienced in supporting Shopify page builder products, educating customers, resolving issues via live chat, and collaborating with technical teams to drive exceptional customer experiences. Strong B2+ English communication skills with a proven ability to de-escalate critical situations and build lasting customer relationships.

WORK EXPERIENCE

Clariont Technologies

Remote

Customer Success Specialist

Dec 2025 – Present

- Managed a portfolio of 80+ active SaaS clients, communicating via live chat, email, and ticketing platforms to resolve product queries and ensure smooth onboarding experiences.
- Served as the primary liaison between customers and the technical team, accurately documenting and escalating reported bugs, ensuring resolution timelines were met consistently.
- Created and maintained a library of self-help articles and video walkthroughs that reduced inbound support tickets by 35% over three months.
- Delivered multi-channel support across live chat, email, helpdesk tickets, and the company's Facebook Group, maintaining an average customer satisfaction score of 4.7/5.

NexaStore Solutions

Indore, Madhya Pradesh

Customer Success Executive

Feb 2024 – Nov 2025

- Assisted Shopify merchants with store setup, page builder configurations using GemPages and PageFly, and third-party app troubleshooting via live chat and email support.
- Partnered with the technical team to investigate and replicate customer-reported issues, preparing detailed case documentation for escalation and ensuring timely follow-up.
- Conducted periodic product training sessions for new customers across different time zones, improving feature adoption rates and reducing churn in the first 90 days.

PROJECTS

Multi-Channel Support Response Tracker | *Google Sheets · Notion · Customer Success*

- Built a centralised tracker in Notion and Google Sheets to log all customer interactions across email, live chat, and social media, enabling the team to monitor response times and identify recurring pain points.
- Used collected data to create a weekly report template that helped management reduce average first-response time by 28% and improve visibility into unresolved tickets.

E-commerce Customer Health Score Model | *Shopify · Data Analysis · Retention Strategy*

- Designed a simple customer health scoring framework for a Shopify SaaS product, categorising users by activity level, support frequency, and feature usage to flag at-risk accounts before churn.
- Piloted the model across 50 trial accounts, enabling proactive outreach that successfully re-engaged 18 customers who had not logged in for over 30 days, improving monthly active user metrics.
